

# HOUSEMATE

## Home pressure systems

A range of 5 cast body pressure pumps, suitable for applications beginning with water supply to a garden tap, up to total supply of a large house. Equipped with a variety of controls, they are a versatile option at a budget price.

### CTJ 100 / 120

Capable of flows to 80 LPM. Normally equipped with an electronic controller for constant flow and dry run protection.

### TT45

Turbine pump with brass impeller, brass removable cover and brass face at rear of impeller for non-sticking.

Available in a 1 litre pressure tank / switch and electronic controller for constant flow in a shower.

### JP81 / 101

An economy jet pump range in cast iron. Flows up to 57LPM and capable of supplying water to large houses. The pump body internals are electrophoretic coated to provide total protection against corrosion.
